ROPER RHODES®
BATH

DESIGNED IN THE HOME OF BATHING

When settlers built the city of Bath in the late first century AD, they named it *Aquae Sulis*, or 'the waters of Sulis.' From the arched monuments of the Roman era to the grandiose Georgian crescents, visionaries have drawn from the same source to create a place steeped in beauty and history. We, too, have found inspiration in this city. For over four decades, Roper Rhodes has combined timeless style with quality and performance. Immersed in the past and designed for the present, we create and furnish enduring bathrooms—from our home to yours.

Behind The Design

BATHTUB MATERIALS

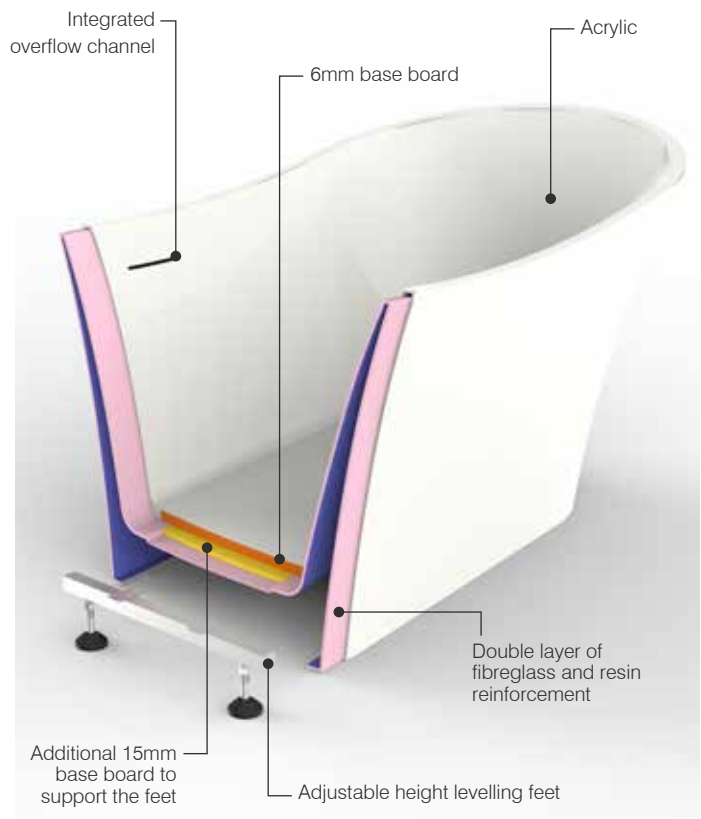

At Roper Rhodes, all of our products are precisely designed and expertly manufactured, using only the highest quality materials. Individually constructed, each bath is evaluated for material quality, structure and shape, consistency of finish and insulating properties. The integrity of our manufacturing process extends to our components and accessories, ensuring every aspect of your bath meets the highest possible standards.

'Our luxurious acrylic bath tubs have a beautifully smooth surface finish with excellent colour consistency'

A Closer Look

All Roper Rhodes baths are built with a dual skinned acrylic body and reinforced with multiple layers of resin fibre to provide superior strength and heat retention.

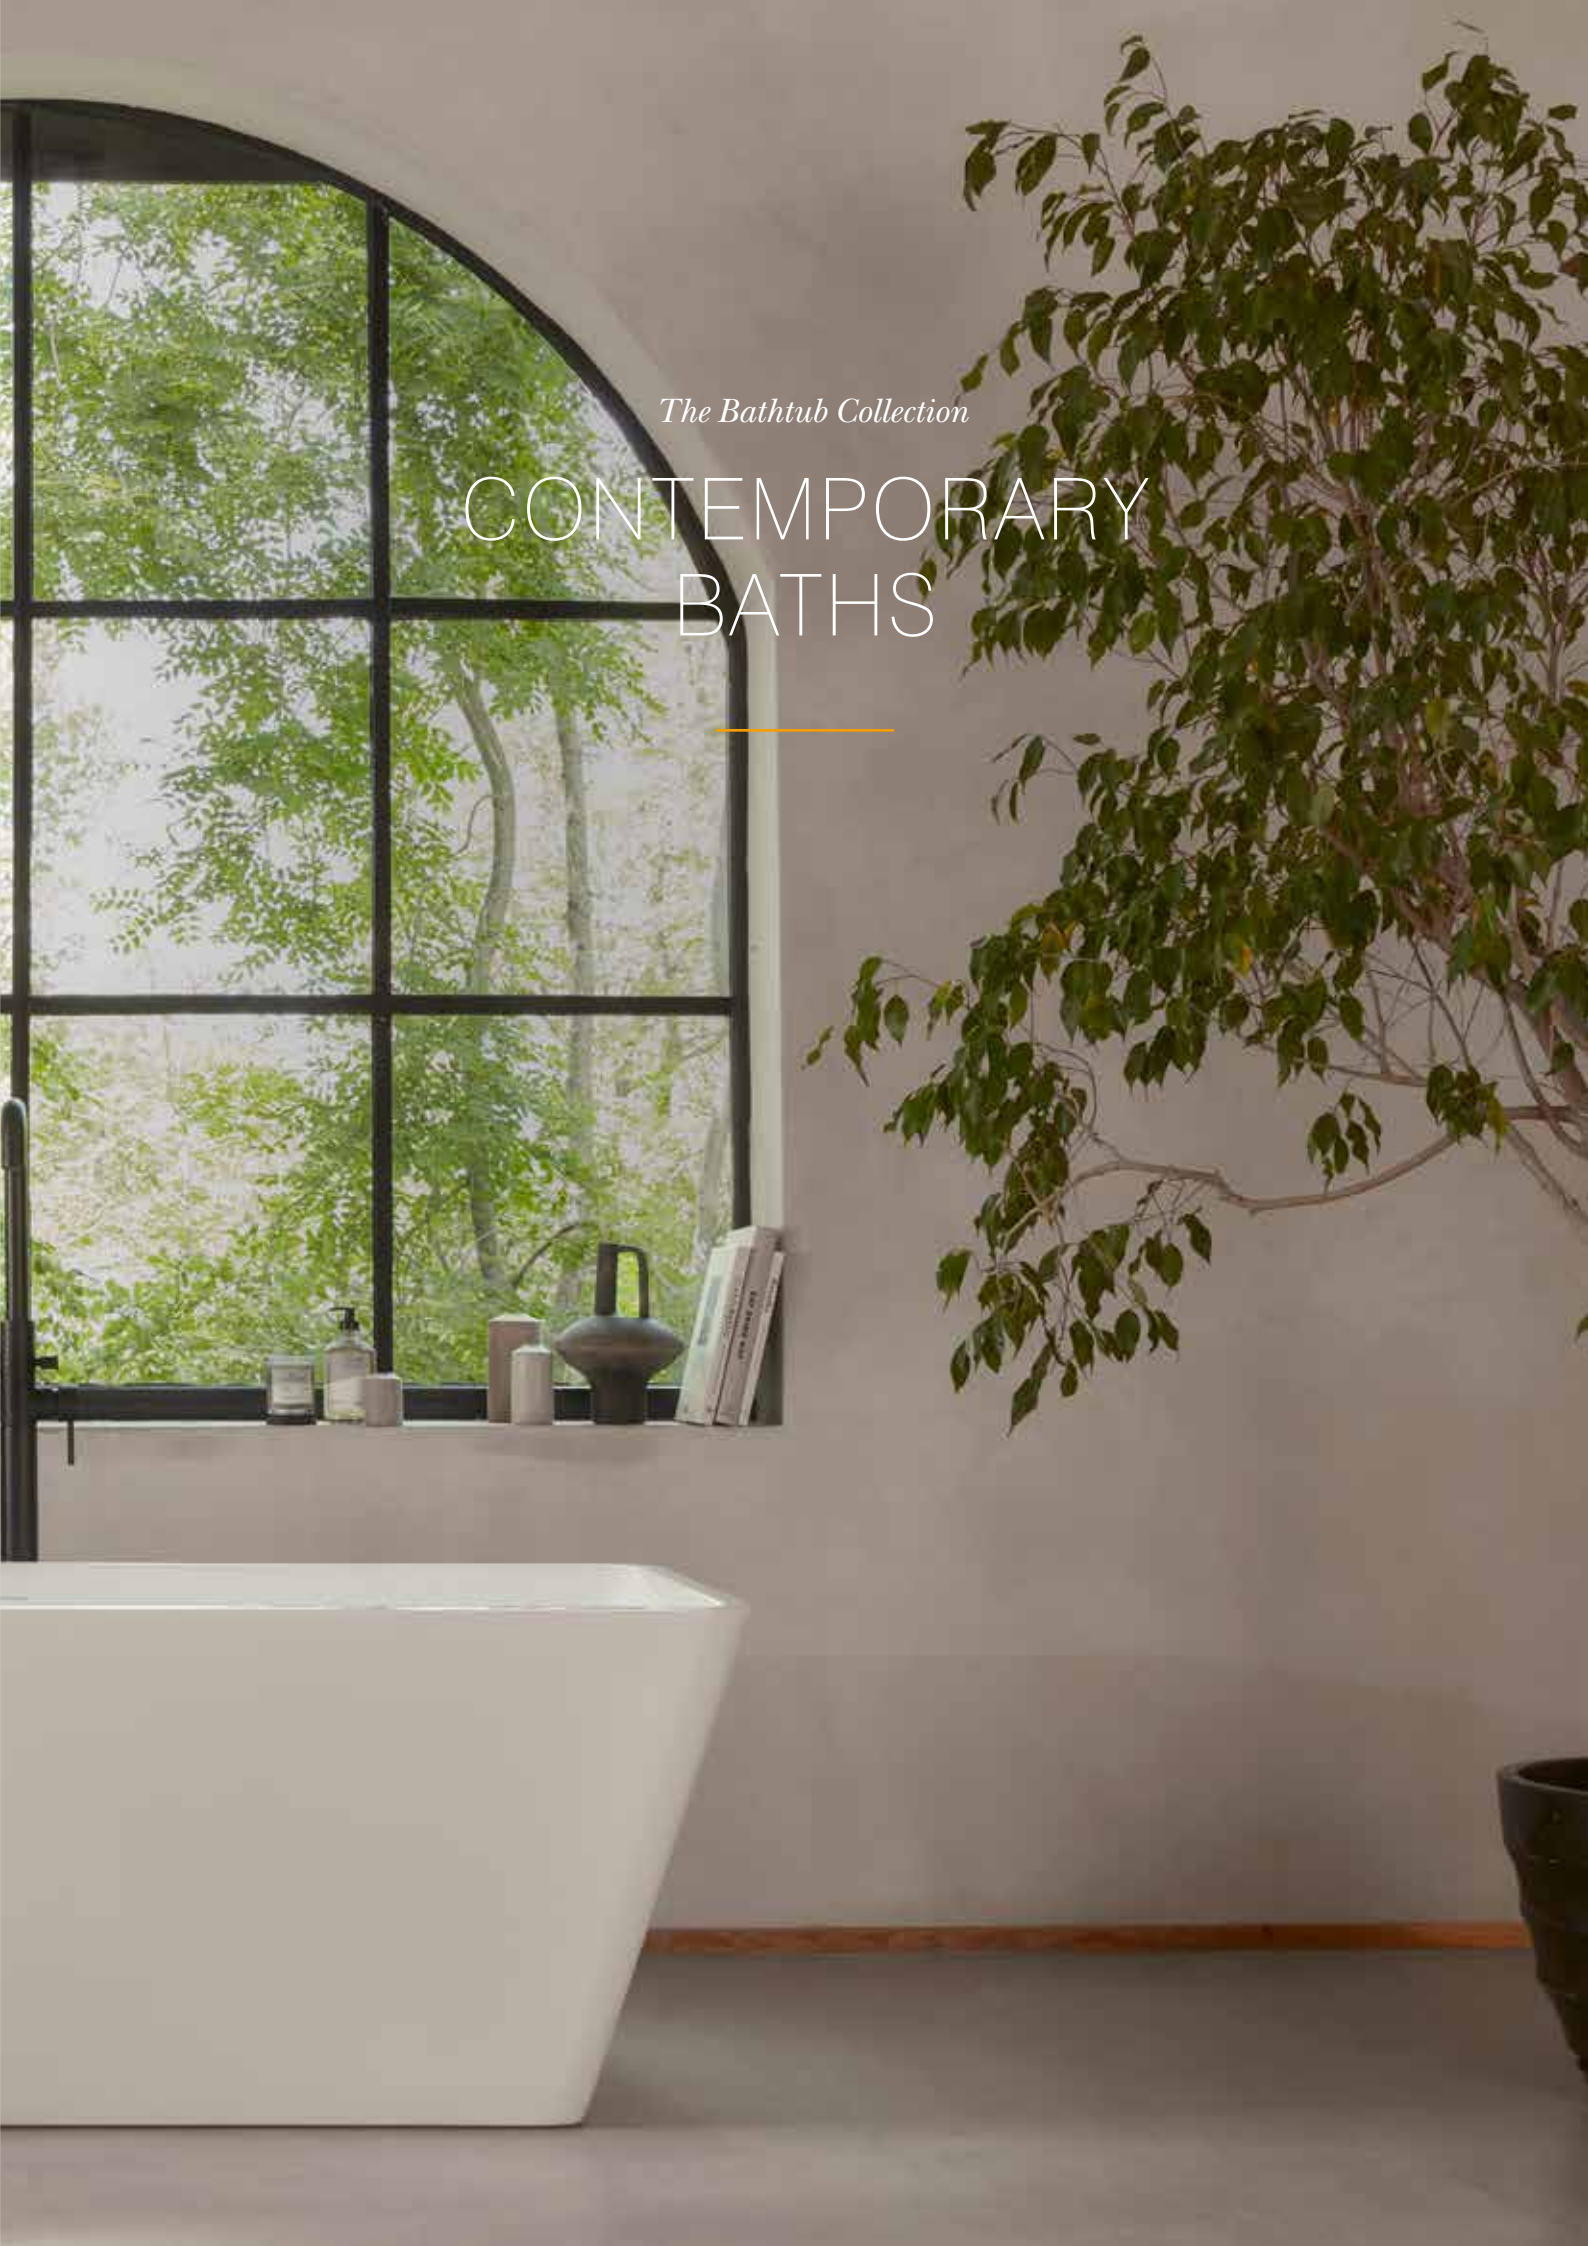

Our acrylic tubs offer several additional benefits. The double layer of acrylic and the middle reinforcement layer provide better insulation, ensuring water stays warm for longer. More robust and long-lasting, dual layered baths are resistant to flexing and deforming under pressure. A smoother, glossier finish allows for ease of cleaning, while a deeper pigment and improved colour consistency prevent discolouration over time.
